

Stenciling on Glass

Materials

Frame with glass
Stencil
Black chalk paint
Makeup sponge
Painter's tape

Paper plate
Polyurethane
Hot glue
Claw tooth hanger

Directions

- 1 Prepare Glass:** Clean your glass thoroughly. Place stencil on glass, using painter's tape to secure it in place.
- 2 Prepare Paint:** Place a teaspoon of black chalk paint on the paper plate. Dab large flat end of makeup sponge in paint, pounce off excess onto the plate until the end looks pretty dry.
- 3 Pounce 1st Coat:** Pounce paint onto the stencil. Don't worry if it looks a little thin on the glass because you're going to give it two coats.
- 4 2nd Coat:** Give the stencil a second coat. Remove stencil. Use your fingernail to remove any accidental spots or excess paint.
- 5 Protect:** Spray your stencil with 2 or 3 coats of gloss or semi-gloss polyurethane to protect against scratching.
- 6 Insert Glass into Frame:** Secure the glass into its original frame by applying a bead of hot glue on the back around the inner edge where the glass and frame meet. Make sure the glue adheres to both the frame and the glass. Test it after it dries to make sure it's safely secured before hanging.
- 7 Hang:** Attach a saw tooth hanger to the back for hanging.
